

BARWARS

The live nightlife war game for college towns.

Greek orgs battle for the bars. Turnout wins turf. Bars get the crowd.

Pre-seed · \$1M raise · Oxford, MS pilot

barwars.app · hello@barwars.app

THE THURSDAY NIGHT PROBLEM

BARS SHOUT INTO THE VOID

Specials, flyers and Instagram posts all compete for the same students on the same nights, with no idea what actually brings people in.

GREEK RIVALRY HAS NO SCOREBOARD

Chapters already compete for status every weekend, but there is nothing that turns that energy into a game the whole town can see.

NOBODY KNOWS WHO REALLY SHOWED UP

Bars can't measure turnout by group or night, and a promotion's real result is guesswork.

THE SOLUTION

THE BAR DISTRICT BECOMES A WAR MAP

Greek chapters declare war on a bar. Members rally and check in, verified by location and a QR code at the door. The side that shows up wins the turf, and the whole town watches it happen on the War Map.

Teams already exist

Fraternities and sororities are organized, loyal and competitive.

Turnout is the score

Nothing counts unless you are physically at the bar.

Bars win either way

Every war is a packed night at a real venue.

HOW IT WORKS

ONE NIGHT, ONE BAR, ONE WINNER

1. DECLARE

A chapter's leader declares war on a bar for tonight.

2. RALLY

Members get the call. Spies and hired mercenaries join in.

3. CHECK IN

At the bar: location within 100 m plus the door QR.

4. WIN THE TURF

Most verified turnout takes the bar on the map.

5. REWARDS

Bracelets, Battle Plan offers and bragging rights.

Around the war: spies and mercenaries, jammed and forged comms, a public Watch Link for spectators, and a bracelet treasure hunt worth free cover.

BUILT, LIVE AND IN BETA

WAR MAP

Live bar status, wars and crowd across the district.

VERIFIED CHECK-INS

Location plus door QR. Turnout can't be faked from a couch.

DOOR MODE

Bouncers scan rotating voucher codes. Green means redeemed.

SPIES & MERCENARIES

Non-Greek players hire out, infiltrate and trade intel.

BAR COMMAND CENTER

Specials, Flares, Battle Plans, inventory and door staff.

IOS NOW, ANDROID NEXT

iOS beta in TestFlight with push and phone verification. Android built, launching next.

WHY IT SPREADS

THE TEAMS ALREADY EXIST. WE JUST KEEP SCORE.

~700

members in co-founder Brooke Butler's sorority chapter at Ole Miss. One chapter can fill a bar on its own.

For scale: Michigan State's average sorority chapter is about 189 members (MSU Fraternity & Sorority Life, Spring 2026). SEC chapters run far larger.

BUILT-IN TEAMS

Chapters recruit, organize and show up together. BarWars gives that a scoreboard.

RIVALRY IS THE HOOK

Losing a bar to a rival chapter is the best retention mechanic there is.

EVERYONE CAN WATCH

Public Watch Links let the whole campus follow a war without an account.

BARS PAY TO BE THE BATTLEFIELD

BARS

Primary revenue

- Flares: paid alerts that pull players to the bar tonight
- Battle Plans and war specials that fire when crowds arrive
- Sponsored skins unlocked by fighting at their bar
- Bracelet drops that turn into free-cover door traffic

PLAYERS

In-app purchases

- Cosmetic skins, \$2.99–\$4.99, through the App Store
- War Bonds, the in-game currency
- Cosmetic only: money never buys a win

DATA

Next

- Verified, anonymized turnout by bar, night and group
- Promotion results measured in real bodies at the door
- Aggregated insights for bars and beverage brands

A DATASET NOBODY ELSE CAN COLLECT

Every BarWars check-in is a verified person, at a specific bar, at a specific time, tied to a specific group. Over time that becomes the only real map of college nightlife demand.

Location-verified

Within 100 m of the bar, plus a rotating door QR

Identity-verified

Phone verification and one account per student email

Outcome-verified

Door redemptions show what a promotion actually drove

WHAT COMPETITORS SEE

Likes, follows and card swipes: signals that someone was probably there.

WHAT BARWARS SEES

Who came, with which group, to which bar and when, verified at the door. It compounds with every war played.

RESPONSIBLE BY DESIGN

ADULTS ONLY

18+ to play. Drink offers are 21+ and the door is told to check ID.

BUILT AGAINST ABUSE

Location-verified play, no names on public maps, block and report everywhere.

NOT JUST DRINKS

Most rewards are cover, food and merch. Drink offers are 21+, and only no-cover or non-alcoholic bracelets can be traded.

BARs STAY IN CONTROL

Bars set every offer, cap and night, and staff verify at the door.

GO TO MARKET

WIN ONE TOWN, THEN RUN THE PLAYBOOK

NOW

OXFORD, MS

Five bars on the Square set up. iOS beta live, Android next. Launching through Brooke's chapter and its rivals.

NEXT 12 MONTHS

SEC COLLEGE TOWNS

Repeat the Oxford playbook in 3–4 towns: seed two rival chapters, sign the bars on the main strip.

THEN

NATIONAL

Co-founder Nick Buckshaw's college athletics network opens doors at universities nationwide.

BUILDER, INSIDER, CONNECTOR

BRIAN BUTLER

Founder & CEO

Product builder. Designed and built the BarWars platform end to end: game engine, bar tools, and iOS and Android apps.

BROOKE BUTLER

Co-Founder, Campus

Ole Miss junior and member of a ~700-person sorority chapter. Leads launch, chapters and player community in Oxford.

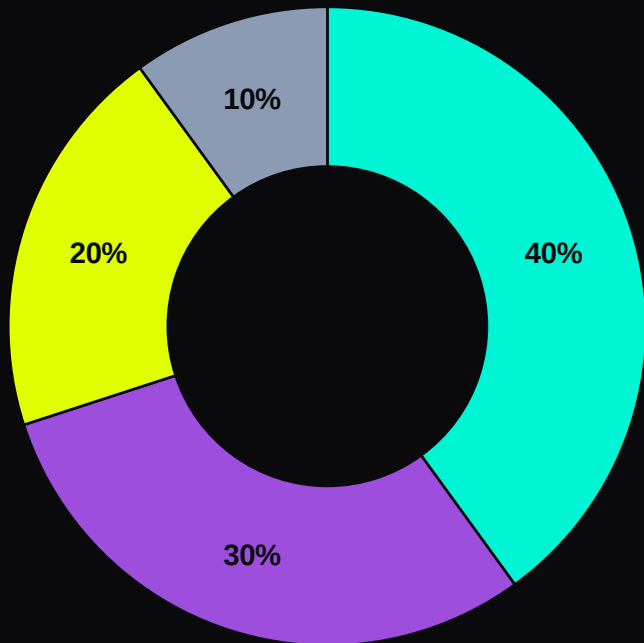

NICHOLAS BUCKSHAW

Co-Founder, Partnerships

Former college football player and New York-based attorney, with relationships at universities across the country.

\$1M PRE-SEED FOR 18 MONTHS

- **40% Product & engineering**
Android launch, bar tools, data layer
- **30% Campus expansion**
3–4 more SEC college towns
- **20% Marketing & ambassadors**
Chapter ambassadors, launch nights
- **10% Operations & legal**
Compliance, insurance, admin

18-month milestones Oxford live with paying bars · 4–5 campuses · iOS and Android public launch · first data product for bars

CLAIM THE TOWN.
